

support media diversity for democracy

On Docket No. 02-277, The Biennial Review of the FCC's broadcast mediaownership rules. I can only assume that you know that by allowing less diversity you are in fact helping to destroy our country. Is that what you are aiming for? Perhaps you havn't read a single history book, all which print in breathtaking black and white what a stupid mistake you are about to make. Or maybe all that fat cash you have been recieving of late has clouded your thinking. But make no mistake, whatever the reasoning for such a move is moot. The bottom line is that if you allow less diversity in our media the US will enter a downward spiral. This is history's one lesson that you in the government should know Mikey.
